Experience

Technical Lead & Co-founder - *Aftercode Software*

Mar 2024 - Present

- Co-founded and led the technical direction of a software company delivering client-facing products, internal tools, and automation workflows.
- Designed frontend architectures with React, TypeScript, Next.js/Vite, Tailwind CSS, and reusable UI components.
- Built document-automation platforms including Legali/LexFlow and Bildenlex, integrating Google Sheets, Google Drive, Airtable, Zod-validated forms, and DOCX generation.
- Developed a Tango-integrated quoting hub for Mi Casa Decoraciones, supporting quote creation, budget storage, and daily operations.

Fullstack Developer - *Nerdconf*

Oct 2021 - Present

- Designed and developed custom websites, interactive games, and digital experiences for Nerdconf, combining React, interactive UI, and advanced 3D experiences.
- Built branded web experiences for conferences and organizations, including WordPress and React websites.
- Translated event and brand requirements into polished, engaging frontend experiences.

Lead Developer - *Corpora*

Jan 2022 - Jul 2023

- Led the development and delivery of software solutions while meeting quality standards and deadlines.
- Implemented custom web pages, document automation, reporting, and internal systems for clients.
- Developed the company's website, internal-use applications, and automations.

Frontend Developer & Mobile Intern - *GoSchool*

Nov 2018 - Dec 2018

- Contributed to an in-house MVP as a frontend and mobile developer, collaborating with the team on a product intended for real-world implementation.
